Subject: neh on the settlement

Tell me the millions in tax dollars spent on this case won't be wasted by settling with another consent decree. I see the settlement as being even worse than what happened last time we settled with Microsoft.

This settlement is loaded with holes and doesn't seem to do much to address Microsoft's past behavior and it certainly doesn't prevent them from doing things to smash the competition in the future.

I don't want to be forced to use Passport to be on the internet!.

My old sig was about Vaxen and VMS but I can't even figure out the name of the company that owns them anymore.
